# **WEATHER OF CONCERN**

## **Weather of Concern**

- The strongest winds during the Santa Ana wind event will occur today, and again late Wednesday night into Thursday. During these times, damaging wind gusts of 50 to 70 mph will be common across wind prone areas of Los Angeles and Ventura Counties, with isolated gusts as high as 80 mph in the mountains.
- For tonight into Wednesday, winds will be somewhat weaker, with gusts generally in the 40 to 60 mph range. The Santa Ana winds combined with humidities in the teens and single digits, along with very dry fuels, will bring an extended period of critical fire weather conditions to much of Los Angeles and Ventura Counties, with extremely critical conditions today and again Thursday due to the strong and damaging winds.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

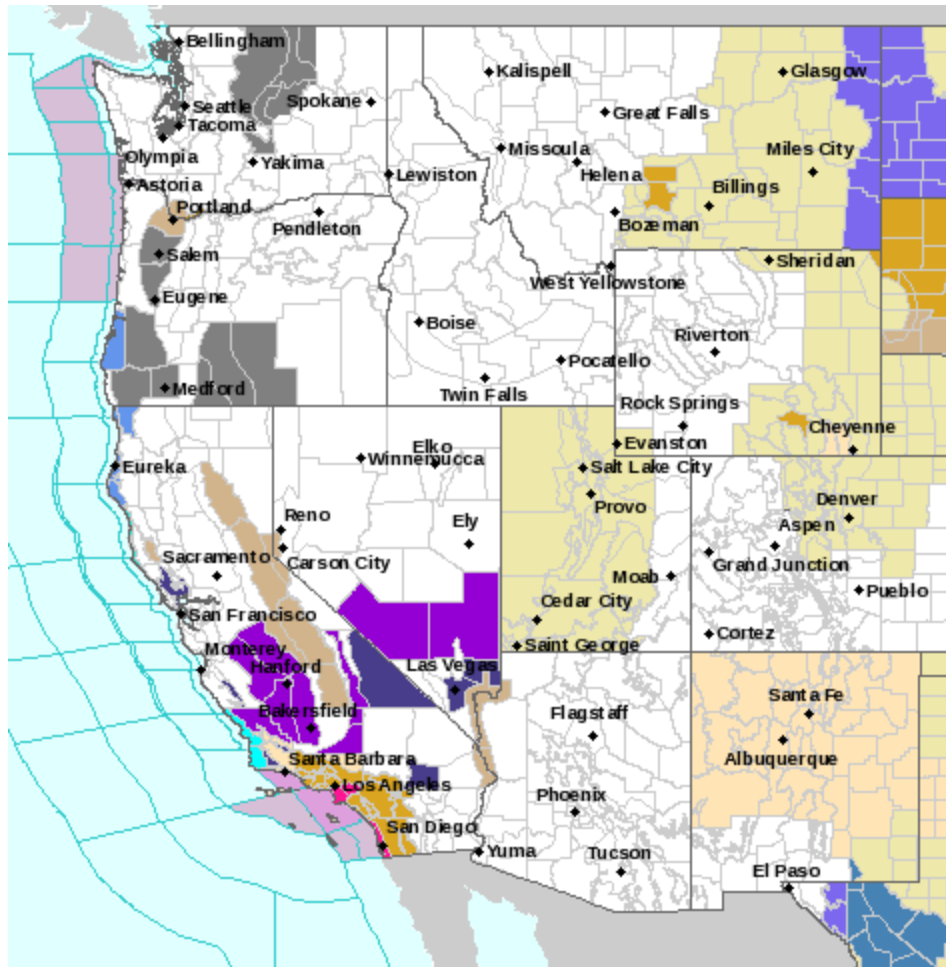

A pattern change underway this week. A strong ridge of high pressure will develop and affect the weather for the next several days. Afternoon temperatures will warm to above normal status and little, if any rain expected during the next 7 to 10 days. Due to the persistent pattern, N to NE and even some offshore wind is expected across the North Ops region through at least mid week. Expect general gusts between 25 to 35 mph with locally between 40 to 50 mph favoring the Sacramento Valley, eastern edges of it as well as portions of the Diablo-Santa Cruz and Bay Marine areas. The flow should become lighter and a little more variable the latter half of the week and last into the weekend. The strongest winds will occur today and tonight.

## **SOUTHERN CALIFORNIA**

\*\*\*Moderate to strong offshore winds along with very dry conditions across Southern California through Saturday morning\*\*\*

Strong surface high pressure over the Great Basin will bring widespread offshore winds of 20 to 40 mph with gusts to 60 mph to much of Southern California tonight through Tuesday afternoon and again Wednesday night through Friday morning. The rest of this week will have more localized winds of 15 to 30 mph with gusts to 50 mph across Southern California. Offshore winds over Southern California are expected to become light by Saturday afternoon. Minimum humidity will be mainly in the teens today and then drop into the single digits Tuesday through this weekend. The back side of a Pacific trough will bring near normal temperatures through Tuesday, with 40s to low 50s across the mountains and 60s to low 70s in the valleys. The area of high pressure off the West Coast will push inland bringing warmer temperatures Wednesday through this weekend. Temperatures across the valleys of Southern California will warm into the low to mid 80s Thursday through this weekend, which is 10 to 15 degrees above normal for this time of year.

# Cal OES LAW ENFORCEMENT MISSIONS

## Cal OES Law Missions

- **2017-LAW-43535, 12/03/2017 at 1900 hours:** Placer County Sheriff requested the assistance of ten Type-1 searchers to locate a missing 33 year old female who walked away from her car after it drove off of the roadway. A tracking canine led searchers to the mouth of a steep canyon, before the search was suspended due to darkness. The subject was last seen dressed in a skirt and heels, and was unprepared for the terrain and cold temperatures. Nevada, El Dorado, and Calaveras County Sheriff's Offices deployed searchers for a 0700 briefing in the Auburn area. **UPDATE, 12/4/17, 1600 hours:** [The missing person has not been located. Placer County requested 50 Type-1 and Type-2 ground searchers to report to the Auburn ICP 12/5/17, 0700 hrs to continue the mission.](#) **Mission Ongoing**
